

Multiplication War Card Game: How to Play

1. **Remove the Jacks, Kings and Queens from a regular deck of cards. I always keep the Jacks, Queens, and Kings in the deck and assign them values (Jack=11, Queen=12, King=20)**
2. **Shuffle and deal the entire deck.**
3. **Players place cards face down in a pile.**
4. **At the count of three, both players flip over their first card.**
5. **The first person to say the product of the 2 cards receives both cards and puts them in a separate pile.**
6. **If both players say the answer at the same time, the cards are put in the middle of the table.**
7. **The next player to win the "flip" gets the cards in the middle of the table in addition to the cards just played.**
8. **The winner is the person with the most cards at the end of play (when all of the cards have been used).**
